# Innovation

---

“Innovation Starts Here” isn’t just our motto, it’s our way of life and allows us to offer you the most technologically advanced cabinet designs and finishes available in the U.S.

The patented Luxe® high gloss finish collection provides the highest scratch resistance on the market by utilizing the most advanced technology in lacquered surfaces, allowing an unmatched color stability and stain resistance.

The Synchron® finish collection provides realistic textured designs, in both the look and feel and allows you the ability to achieve a beautiful harmony of texture and design throughout.

The ZENIT® collection provides a supermatt surface with a silky feel and an extraordinary resistance to abrasion. ZENIT® is the result of our continuous improvement in lacquering technology with a design collection that even provides an anti-fingerprint option.

Matinno offers the most advanced full access/frameless modular box on the market featuring a moisture resistant core and an antibacterial surface, stopping the propagation of 99.99% of bacteria and microbes.

# Sustainability

---

Matinno Living is leading the charge in sustainability at a fraction of the cost. We offer beautiful, functional cabinetry with the lowest impact to our environment at the forefront. We keep our process simple, fine-tuning our operations and products to be as efficient as possible. From our use of engineered wood to the benefits of our pressed melamine finishes, Matinno aims to be the most environmentally conscious kitchen on the market.

- By far, the most important environmental impact from paints is the release of volatile organic compounds (VOCs). Once in the atmosphere, VOCs participate in the formation of ozone and cause numerous health conditions. Our finishes contain 50-100% fewer VOCs than paint.
- Our producers collect wood responsibly, supported by recycling and sustainable forestry to produce carbon negative products.
- All our products are CARB 2 certified.
- Our corporate commitment to the environment extends beyond our facility. All associates understand responsible stewardship and what they do on the job impacts the environment.
